Agency Master Playbook & Execution Roadmap

Co-Founders: Bhagat Mukhiya & Yash Gaikwad | **Focus:** Automation, Web Dev, SaaS & Consumer Connect

1. Complete Business Lifecycle (From Zero to Retainers)

A step-by-step sequential path designed to take your agency from a local zero-cost setup to a high-margin monthly recurring revenue (MRR) model in Mumbai and beyond.

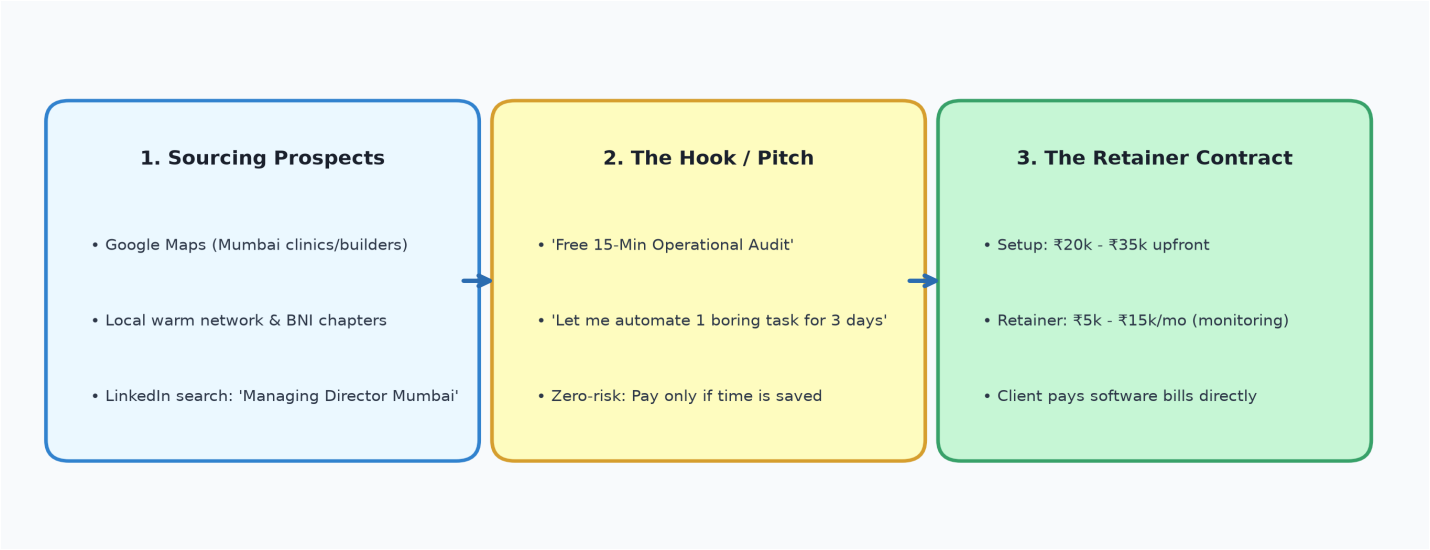

2. Agency Website Architecture (High-Converting 1-Page Layout)

Do not build a 10-page bloated corporate website. A modern agency website needs only **5 high-impact sections** focused on solving business bottlenecks:

Website Section	Key Elements & Content	Conversion Goal
1. Hero Header	One clear hook: *'We automate manual office work, build custom web portals, and scale your customer outreach.'* Direct WhatsApp CTA button.	Captures attention in under 5 seconds.
2. 3 Core Pillars	**1) Web & SaaS Dev:** Custom portals, dashboards, landing pages. **2) Workflow Automation:** Invoices, CRM sync, auto-triage. **3) Consumer Connect:** WhatsApp API bots, automated SMS/email sequences.	Shows full-service capability.
3. Interactive Proof	Two short 60-second video screen recordings (Loom): • Invoice PDF $ o$ Excel row in 5 seconds. • Meta Lead $ o$ Instant WhatsApp greeting + calendar booking.	Builds immediate visual trust.
4. Founder Credibility	Photo & bios of Bhagat Mukhiya & Yash Gaikwad: Highlighting technical speed, personal accountability, and local Mumbai availability.	Eliminates 'nameless agency' doubt.
5. The No-Risk CTA	*'Book a Free 15-Minute Operations Audit'* (Cal.com / WhatsApp link). We analyze your current manual tasks and give a free automation blueprint.	Zero-friction meeting bookings.

3. Client Acquisition Funnel (Sourcing to Signed Retainer)

How Bhagat and Yash will generate warm leads, pitch with zero resistance, and close monthly retainer contracts:

4. Target Audience Matrix & Concrete Offers in Mumbai

Target Niche	Their Daily Bottleneck	Your Exact Solution	Price Point
Real Estate & Channel Partners (Thane, Andheri, Navi Mumbai)	Hundreds of leads from 99acres & Facebook ads go cold because callers respond hours late.	**Instant WhatsApp Responder:** 15-sec greeting, budget pre-qualification, auto-schedules site visits to Google Calendar.	■25,000 setup + ■7,500/mo
Chartered Accountants & Traders (Fort, Crawford Market, BKC)	Accountants spend 10-15 hours/week typing invoice data from PDFs/photos into Tally.	**AI Invoice-to-Sheet Scanner:** Gemini Vision OCR reads bills, extracts GST, total, vendor, and fills spreadsheets automatically.	■30,000 setup + ■10,000/mo
D2C Brands & Local Clinics (Bandra, Juhu, South Bombay)	Staff bombarded by repeated FAQs, clinic timing queries, and manual appointment logging.	**Smart Web Booking + AI Bot:** Custom interactive website with WhatsApp triage bot handling 80% of routine questions.	■40,000 setup + ■10,000/mo

5. Co-Founder Responsibility Split

To execute smoothly and scale rapidly without overlapping or confusion, divide tasks clearly:

- **Technical & Automation Architect (Bhagat Mukhiya):** n8n workflow construction, Gemini API prompts, Python scripts, web portal logic, and error monitoring.
- **Client Acquisition & Frontend Experience (Yash Gaikwad):** Outreach message sequences, client discovery calls, demo recordings, UI/UX frontend styling, and weekly client reporting.

6. The 'Zero-Resistance' Client Outreach Script

'Hi [Name], we noticed your team is running ads on Facebook/Google. Most businesses lose 40% of their ad spend because leads aren't contacted within 5 minutes. Bhagat and I built an automated system that connects incoming leads to WhatsApp in 15 seconds and puts qualified appointments on your phone. Can we set this up for 3 days on a test run for free? If it saves your team time, we can discuss a monthly partnership. If not, you owe us nothing.'
