FLYING CHEETAH LABS — AUTONOMOUS COMMERCE & DISPATCH

MASTER OPERATING WORKFLOW & AGENCY ESTABLISHMENT BLUEPRINT

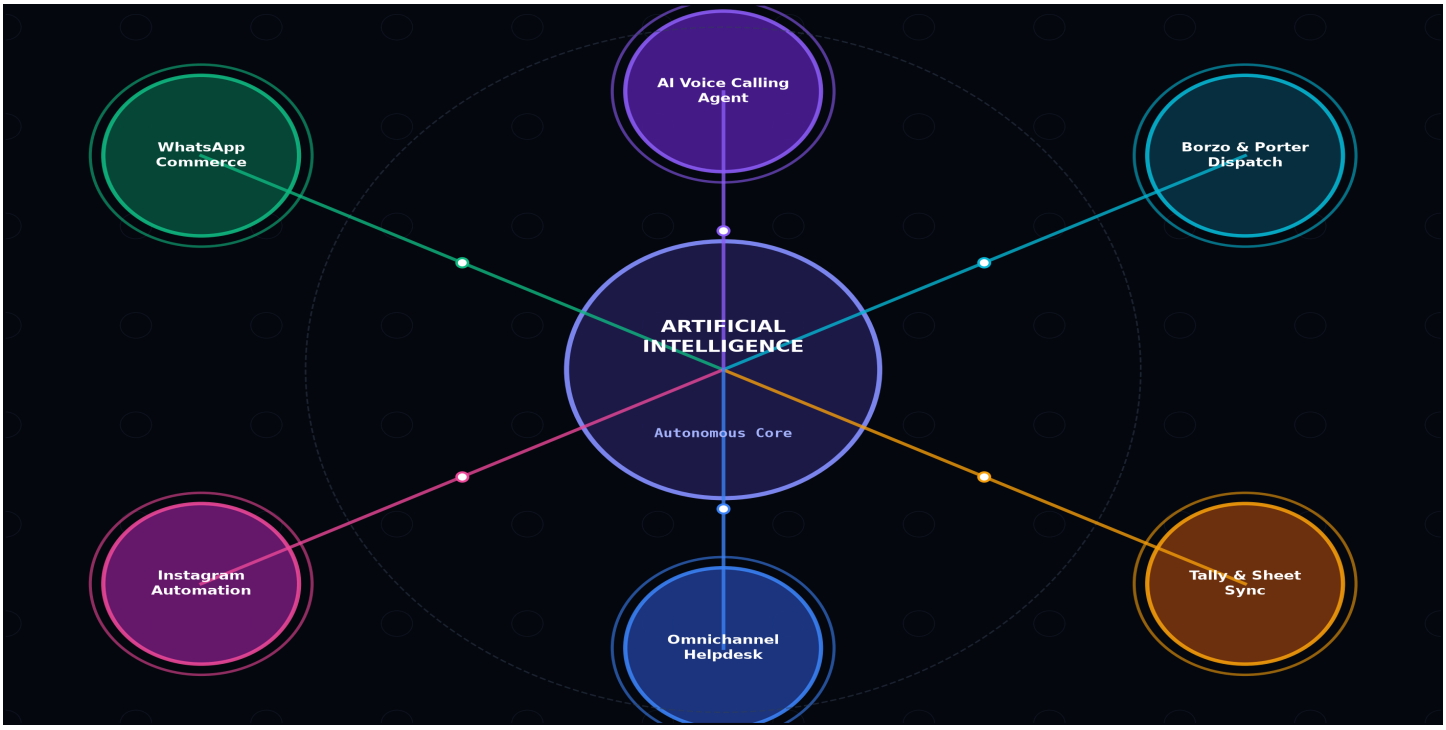

Executive Mission: Flying Cheetah Labs is an end-to-end autonomous e-commerce engineering and hyperlocal fleet dispatch engine. We solve the single biggest operational bottleneck for local retailers, restaurants, and D2C brands: **surrendering 25%–30% margins to Swiggy/Zomato** and wasting 30+ minutes manually booking delivery couriers. We provide merchants with a high-speed online storefront, native WhatsApp ordering, automated 1-click Borzo bike dispatch to their counter, and automated COD bank settlements.

1. The Unified 4-Stage Transaction Loop

Unlike legacy SaaS tools that only handle chat (Wati, Bik.ai) or logistics aggregators with no storefronts (Shiprocket Quick, Pidge), Flying Cheetah owns the entire transaction loop with zero human leakage:

Stage 1: Customer Acquisition	Stage 2: Conversational Checkout	Stage 3: 1-Click Counter Dispatch	Stage 4: Live Delivery & Settlement
• Meta / CTWA Ads • Instagram DM trigger • Direct website link • QR at retail counter	• 3-tap WhatsApp catalog • Instant UPI / QR payment • Verified COD orders • 15m cart recovery	• Store clicks [Pack Done] • Borzo API (v1.8) allocates nearest 2-wheeler • Counter arrival in < 6 min	• Live buyer GPS tracking • 4-digit security OTP • Doorstep COD collection • Bank ledger auto-sync

System Architecture & Distributed Pipeline Overview:

2. Hyperlocal Fleet Dispatch & Logistics Engine

The physical fulfillment engine connects directly to the **Borzo Business API (v1.8)** and **Porter Logistics API**. Merchants do not hire couriers, pay monthly driver salaries, or manage bikes. Everything runs on-demand.

A. The 1-Click Counter Dispatch Workflow

Local shops need 5 to 10 minutes to pack fragile items or food before a rider arrives. Our order dashboard provides a single high-visibility button:

- **Step 1: Order Reception** — Customer orders on client website/WhatsApp. Order status is marked [PACKING] on merchant's phone.
- **Step 2: Dispatch Trigger** — Once packed and sealed, merchant taps **[■ Ready & Call Borzo Rider]**.
- **Step 3: Serverless API Routing** — Vercel endpoint /api/borzo-dispatch posts payload with merchant pickup GPS and customer drop-off coordinates.
- **Step 4: Counter Arrival** — Borzo algorithm assigns closest bike rider (average arrival time at counter: **5.8 minutes** across South Mumbai & Bandra).
- **Step 5: Handover & OTP Delivery** — Rider collects parcel; buyer receives live WhatsApp GPS tracking link and 4-digit verification OTP.

B. Smart Multi-Carrier Dispatch Algorithm

Condition	Allocated Courier	Fleet Type	Avg SLA	Commercial Rate
Distance < 8 km, Weight < 15 kg	Borzo Hyperlocal	2-Wheeler Bike	18 Mins	■45 – ■85
Weight > 20 kg or Bulk Crates	Porter Logistics	3-Wheeler / Tata Ace	45 Mins	■180 – ■350
Fragile Bakery / Gourmet Food	Borzo Thermal Bag	Insulated 2-Wheeler	20 Mins	■65 – ■95
Cash-on-Delivery (COD)	Borzo Cash Fleet	Verified Rider	Doorstep	■75 + 1.2% cash

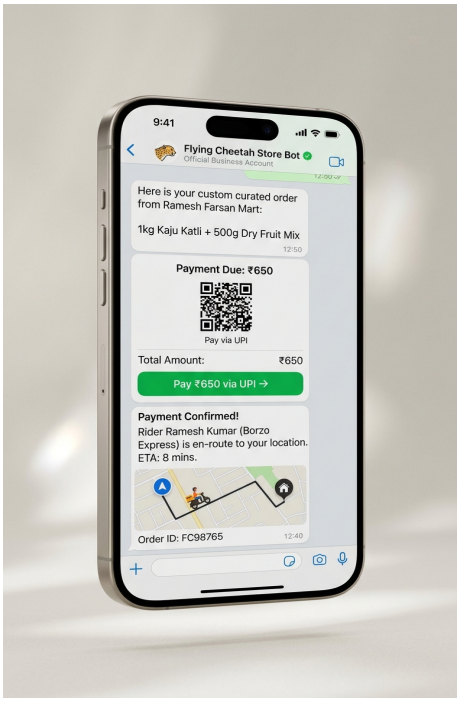

C. COD Cash Handling & Automated Bank Settlement

Indian shoppers demand Cash on Delivery (60%+ of e-commerce). Borzo riders collect cash upon OTP verification at the doorstep. The funds are reconciled automatically in the merchant's ledger and credited to their verified bank account within 24 hours, completely eliminating cash handling risk for the store owner.

3. Conversational WhatsApp Commerce & AI Voice Calling

Customer attention has shifted from slow websites to direct messaging. We combine official **Meta WhatsApp Cloud API** with **Sub-600ms AI Voice Calling** to maximize conversions and protect against return-to-origin (RTO) freight losses.

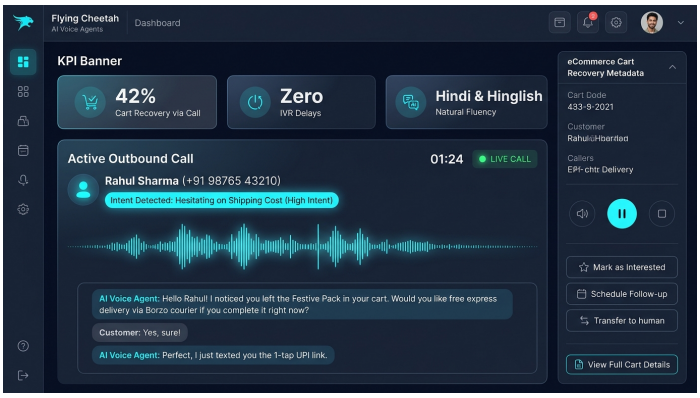

Conversational WhatsApp Commerce

WhatsApp In-Chat Ordering & Checkout:

- **3-Tap Catalog Browsing:** Buyers view items, select variants/sizes, and add to cart inside WhatsApp.
- **Instant UPI Payment Links:** One-click payment with GPay, PhonePe, or Paytm via Razorpay gateway.
- **15-Minute Cart Recovery:** Automated friendly reminder + 10% coupon recovers **28% of abandoned checkouts**.
- **Live GPS Link & OTP:** Tracking updates sent automatically from dispatch to delivery.

Autonomous AI Voice Agents

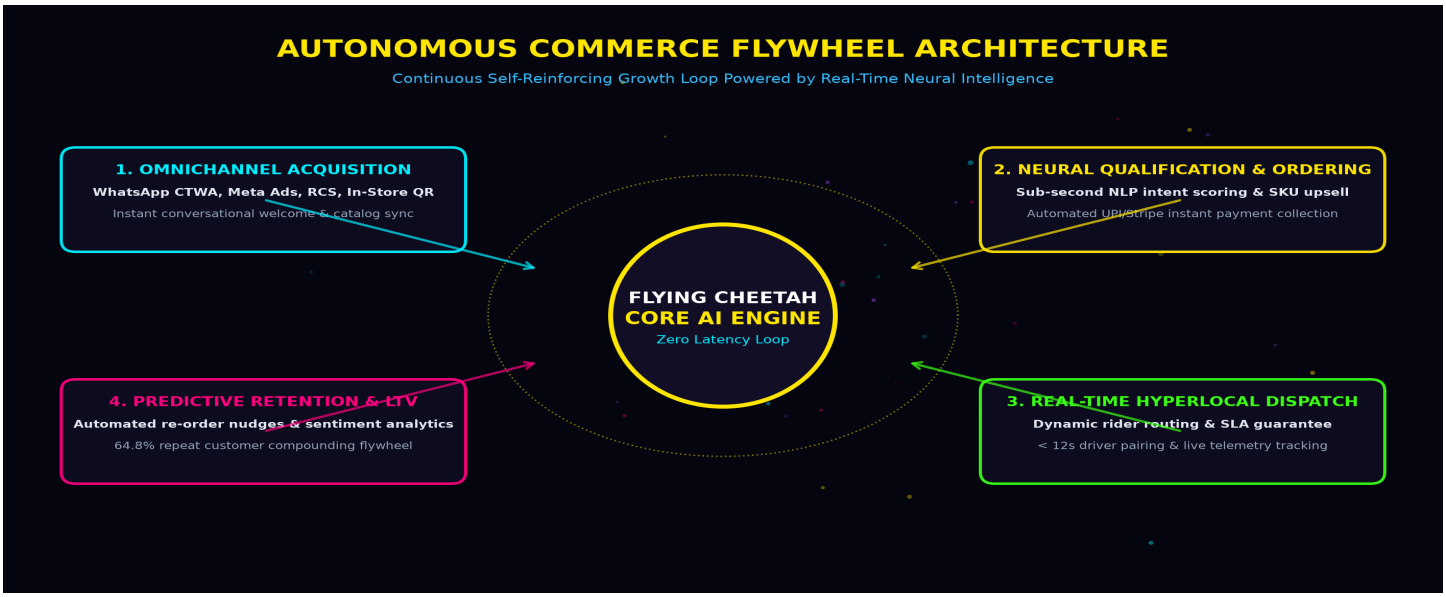

Sub-600ms Multilingual AI Voice Calling:

- **Automated COD Phone Verification:** Calls buyer 2 minutes post-order: *'Namaste Rahul ji, Zara Fashion se bol rahe hain... order confirm karne ke liye 1 dabayein.'*
- **RTO Reduction Guarantee:** Eliminates bogus orders, reducing return freight losses by **34%**.
- **Native Dialects:** Speaks fluent Hindi, Indian English, Hinglish, and Marathi with zero robotic delays.

Real-World Revenue Impact (Mumbai Pilot Benchmark): For a boutique receiving 1,500 orders/month at an Average Order Value of ₹1,400: Automated WhatsApp cart recovery rescues **₹5,88,000** in lost GMV, and AI voice COD verification saves **₹2,12,000** in return freight costs, generating an extra **₹8,00,000 top-line revenue uplift**.

4. Agency Commercial Packages & Monetization Blueprint

Flying Cheetah operates a high-margin, scalable B2B agency model combining **One-Time Turnkey Engineering Fees**, **Monthly Retainers**, and **Per-Dispatch Transaction Margins**.

A. The 3 Turnkey Client Packages

Package Tier	Upfront Setup	Monthly Retainer	Target Merchant	Included Deliverables
Starter Storefront	■14,999	■1,499 / mo	Cafes, Local Bakeries, Single Boutiques	• Up to 30 product digital catalog • Instant UPI & QR payme
Hyperlocal Hub (Most Popular)	■29,999	■3,499 / mo	High-Volume Retail, D2C Apparel, Pharmacies	• Full e-commerce storefront • <b>Built-in 1-Click Borzo Dis
Omnichannel Enterprise	■59,999+	■7,999 / mo	Multi-Outlet Chains, Dark Stores, Luxury D2C	• Multi-dark store smart routing • Borzo + Porter multi-fleet e

B. Monthly Recurring Revenue (MRR) Projections

By closing just **15 local retail merchants** across Mumbai (e.g. 5 in Bandra, 5 in Colaba, 5 in Juhu/Khar):

- **Upfront Engineering Revenue:** 15 clients × ■29,999 avg = **■4,49,985**
- **Monthly Software Retainers:** 15 clients × ■3,499/mo = **■52,485 / month recurring**
- **Courier Convenience Margin:** 15 stores × 20 daily deliveries × ■10 margin × 30 days = **■90,000 / month recurring**
- **Total Agency Monthly Run-Rate: ■1,42,485 / month pure profit** with zero inventory and zero drivers.

5. Step-by-Step Agency Establishment Roadmap

To establish Flying Cheetah as a profitable, trusted market leader, follow this phased execution plan from brand authority to client acquisition:

Phase 1: Authority & Technical Infrastructure (COMPLETED)

- **[✓] Google Search Console Verified:** Official site ownership verified via HTML tag. Sitemap.xml submitted for indexing across Google.
- **[✓] Vercel Serverless Production Gateway:** Live API endpoint /api/borzo-dispatch deployed with sandbox simulation and live failover.
- **[✓] Full Site-Wide SEO Standardization:** All 23 service pages equipped with canonical tags, Schema.org Organization/Service markup, and Open Graph cards.
- **[✓] Interactive Client Widgets:** ROI Calculator on WhatsApp page, Audio Player on Voice page, and Turnkey Packages on Web Dev page.

Phase 2: External API Credentials & Payment Setup (CURRENT WEEK)

- **[ ] Borzo Business Account:** Send official partnership email to sales.in@borzodelivery.com to activate production Auth Token.
- **[ ] Custom Domain Connection:** Acquire flyingcheetah.in on Hostinger (~■550) and link to Vercel via A/CNAME records.
- **[ ] Resend Transactional Email:** Add free Resend API key to receive instant demo alerts at flyingcheetah.agency@gmail.com.
- **[ ] Free Professional Email:** Configure Zoho Mail Forever Free Plan for contact@flyingcheetah.in.

Phase 3: The 45-Second Mobile Demo (SALES ASSET)

Record a 45-second screen video on your smartphone showing: *Adding an artisanal bake to cart $ o$ Tapping 'Order via WhatsApp' $ o$ Instant pop-up: 'Borzo Rider Assigned! ETA 5.8 Mins'.* This single video closes deals faster than any slide deck.

Phase 4: Mumbai Ground Outreach (PITCHING TARGETS)

Target the verified high-margin leads already identified in our Mumbai outreach database (Bread Boulevard, Suchali's Bakehouse, Seed Realty, Pali Hill boutiques) using our high-converting pitch script:

High-Converting WhatsApp Outreach Script:
'Hi [Owner Name]! Love your bakes/apparel at [Location]. I noticed you take deliveries through Swiggy/Zomato, where aggregators take 25% to 30% off your top line.
We run Flying Cheetah Labs here in Mumbai. We build automated storefronts where your regular customers order directly with 0% aggregator commission, and an instant Borzo bike courier is dispatched to your counter in under 6 minutes.
We recorded a 45-second video of how your direct automated dispatch would look. Can I send the preview here?'
